**Subject:** Feedback?

Hi

I received an email recently requesting feedback on *Quality of assessment in vocational education and training – Discussion Paper*.

Firstly, I am a Director of a Training Organisation in NSW (ID # 90768)

I haven't got time to complete the whole 13 page Word doc, but I would like to offer the following:

1. Integrity of the Qualifications in the VET sector is absolutely the most important requirement. Do whatever you need to in order to achieve this.
2. After Graduation, the Students and Employers who received the Training should be asked if the Training given was beneficial and the Training Organisation is reputable. DON'T rely on the Training Organisation to provide feedback. ASQA (or it's contractor) should do INDEPENDENT analysis – not just paper or online (tick a box) style, but personal conversations (on phone or in person), so a complete QUALITATIVE analysis can be made. Use this information/feedback to ensure problems are addressed quickly and that the INTEGRITY of the Training is upheld.

Hope that helps,

Many thanks

Tony
